

SNIT 2001

A **Summer Institute** will be organized at TRIUMF this July 2001 for graduate students and advanced undergraduates (others are also welcome!).

Dates: **9-20 July, 2001**

Venue: **TRIUMF Auditorium**

The topics to be covered will be:

- Hot topics in particle physics at the precision frontier
- Statistical methods for particle and nuclear physicists
- Spin and polarization formalism
- Atomic physics for nuclear physicists
- Basic electronics for experimentalists
- Radioisotope production techniques

The above topics will be covered in one hour lectures in the morning followed by tutorial sessions in the afternoon.

Consult the “SNIT 2001” web page for more information and registration procedures at: **<http://www.triumf.ca/snit>**
